

Enterprise Connect Standard

Simple yet high-performance site networking.

arcade Enterprise Internet Standard products make use of a FTTH fiber optic network, available at over 1.5 million endpoints across Switzerland. With this product, your company will benefit from fast Internet at a fair cost/performance ratio. Service production is via highly standardized telecommunication and network platforms.

Advantages

- Symmetrical bandwidths on a best-effort basis
- Fair cost/performance ratio
- Available throughout Switzerland
- Direct and personal contact with your service provider
